RESTRICTION INTO GROUPS

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22, drawn to compounds, compositions, and methods thereof having Formula 2 wherein both W1 and W2 = CR10R11, classified in class 548, subclass 400+.
 - II. Claims 1, 8, and 15-22, drawn to compounds, compositions, and methods thereof having Formula 2 wherein one of W1 or W2 = CR10R11 and the other is oxygen, classified in class 548, subclass 215+.
 - III. Claims 1, 2, 8, 9, and 15-22, drawn to compounds, compositions, and methods thereof having Formula 2 wherein one of W1 or W2 = CR10R11 and the other is NR12, classified in class 548, subclass 300.1+.
 - IV. Claims 1, 2, 8, 9, and 15-22, drawn to compounds, compositions, and methods thereof having Formula 2 wherein one of W1 or W2 = CR10R11 and the other is sulfur, classified in class 548, subclass 146+.
 - V. Claims 1, 8, and 15-22, drawn to compounds, compositions, and methods thereof having Formula 2 wherein one of W1 or W2 = CR10R11 and the other is selenium, classified in class 548, subclass 100+.
 - VI. Claims 1, 8, and 15-22, drawn to compounds, compositions, and methods thereof having Formula 2 wherein both of W1 and W2 = oxygen, classified in class 548, subclass 215+.

Art Unit: 1616

- VII. Claims 1, 8, and 15-22, drawn to compounds, compositions, and methods thereof having Formula 2 wherein one of W1 or W2 = oxygen and the other is NR12, classified in class 548, subclass 215+.
- VIII. Claims 1, 8, and 15-22, drawn to compounds, compositions, and methods thereof having Formula 2 wherein one of W1 or W2 = oxygen and the other is sulfur, classified in class 548, subclass 146+.
- IX. Claims 1, 8, and 15-22, drawn to compounds, compositions, and methods thereof having Formula 2 wherein one of W1 or W2 = oxygen and the other is selenium, classified in class 548, subclass 215+.
- X. Claims 1, 2, 8, 9, and 15-22, drawn to compounds, compositions, and methods thereof having Formula 2 wherein both of W1 and W2 = NR12, classified in class 548, subclass 300.1+.
- XI. Claims 1, 2, 8, 9, and 15-22, drawn to compounds, compositions, and methods thereof having Formula 2 wherein one of W1 or W2 = NR12 and the other is sulfur, classified in class 548, subclass 146+.
- XII. Claims 1, 8, and 15-22, drawn to compounds, compositions, and methods thereof having Formula 2 wherein one of W1 or W2 = NR12 and the other is selenium, classified in class 548, subclass 100+.
- XIII. Claims 1, 2, 8, 9, and 15-22, drawn to compounds, compositions, and methods thereof having Formula 2 wherein both of W1 and W2 = sulfur, classified in class 548, subclass 146+.

Art Unit: 1616

XIV. Claims 1, 8, and 15-22, drawn to compounds, compositions, and methods thereof having Formula 2 wherein one of W1 or W2 = sulfur and the other is selenium, classified in class 548, subclass 100+.

XV. Claims 1, 8, and 15-22, drawn to compounds, compositions, and methods thereof having Formula 2 wherein both of W1 and W2 = selenium, classified in class 548, subclass 100+.

Note: Claims appearing in more than one group will be examined only to the extent that the claims read on the elected invention.

2. The inventions are distinct, each from the other because of the following reasons: Inventions I-XV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the inventions are unrelated because depending on the values of W1 and W2 the compounds (and compositions) are structurally different. Thus, there is no common core and a search of one group would neither anticipate nor render obvious another group of compounds, compositions, and uses thereof.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1616

ELECTION OF SPECIES (*for search purposes only*)

4. Claims 1-22 disclose a plurality of disclosed patentably distinct species comprising the Groups set forth above. In particular, the variables of Formula 2 may vary such that the compounds (and compositions) are structurally different and do not render obvious or anticipate other species encompassed by Applicant's invention. Thus, Applicant is respectfully requested to elect a single disclosed species, even though this requirement is traversed.

Note: *The Examiner respectfully requests that the Applicant assign each variable the appropriate value when electing a species (i.e., X = hydrogen; Z = nitrogen; Y = -CH₃; etc.) and state which claims are drawn to the elected species.*

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Due to the complexity of the restriction requirement, a telephone call was not made to request an oral election to the above restriction requirement.

Art Unit: 1616

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. L. Jones whose telephone number is (703) 308-4640. The examiner can normally be reached on Mon.-Fri. (alternate Mon.), 6:45 a.m. - 4:15 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jose' Dees can be reached on (703) 308- 4628. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-4556 for regular communications and (703) 308-4556 for After Final communications.
